

Special Issue on 'The Future of Computational Law': Introduction by the Editors

Mireille Hildebrandt*

Frank Pasquale**

Abstract

On 20-21 November 2024 the second International Conference on Cross-Disciplinary Research in Computational Law (CRCL23) hosted the Symposium on The Future of Computational Law. A range of invited thought leaders in this domain presented their position paper on the subject: Lyria Bennett Moses, Floris Bex, Natali Byrom, MireilleHildebrandt, Sayash Kapoor & Peter Henderson & Arvind Narayanan, Sarah Lawsky, Denis Merigoux and Frank Pasquale & Gianclaudio Malgieri. In this special issue we publish their papers, hoping to further nourish key conversations between lawyers and legal scholars and developers and computer scientists. The first paper, by Mireille Hildebrandt comments on the themes and the content of the papers after offering an analysis of 'the future of computational law' and of its relation to 'the rule of law'.
